Subject: Fw: ADDITIONAL - OASQA Comments on SERAS Validation Procedures

[Ex. 4 - CBI]

I am forwarding additional micro comments on the original memo. Some of these came up again on the review of the revised 7/13/12 memo.

Again - I realize that all these e-mails may be confusing - please call me with any questions.

That should be it for the comments!

Thanks - Kelley

Subject: ADDITIONAL - OASQA Comments on SERAS Validation Procedures

Hi [Ex. 4 - CBI]

I am forwarding a few additional comments that pertain to the micro discussion in your technical outline of the data assessment procedures used to review the data for the Dimock Groundwater project. I would appreciate it if you would review the attached comments, along with the earlier comments that I forwarded on June 7th, and revise the document, as necessary. I realize that this is a short week - but we are hoping that you would be able to make any necessary revisions and provide a final document via e-mail by COB next Tuesday 7/10/12.

Please do not hesitate to contact us with any questions regarding these comments.

Thanks again for all your help - Kelley

Here's another set of comments for micro.

I'm taking a look at the technical summary now.

Sorry I did not have this to you sooner, but this afternoon's reboot took out my computer for 45 minutes.

Below is very important. The corrective action they stated for a contaminated method blank is wrong.

Comments:

Wherever "Fecal Coliforms" is used, it should be changed to "Fecal Coliforms/*E. coli*" since it is my understanding that current work is using a method that detects *E. coli* instead of Fecal Coliforms. They are nearly the same thing, but not exactly. EPA documents use "Fecal Coliforms/*E. coli*".

p.6 :

Method Blank Action for HPC (Delete FC as the media for FC/*E. coli* is checked for sterility before the analysis is done. Media is not used if contaminated.)

if >= RL, the action is to reject the data See SM9020B(8)(a)(5) and the SDWA Lab Cert. Manual paragraph 5.5.11 ("Data should be rejected if control is contaminated.")

"No Associated Method Blank" Reject the data because QC needed to validate the results was not performed, i.e., method was not followed.

Subject: Fw: Draft Final SERAS Data Validation Procedures Memo

Hi Cindy -

I am forwarding the attached draft memo which was prepared by Ex. 4 - CBI SERAS) to provide a highly technical discussion of the project level review. The memo specifically focuses on SERAS's data review and validation procedures. While this is the contractor's work product, we would the QASQA Branch to review the memo and let us know whether you have any comments or questions - especially where the lab's process/role is referenced.

I will also be forward two companion pieces to SERAS's memo later today - hopefully by 2 pm. One is 5 page draft memo which provides a technical summary of the overall data collection, validation and review process for this project. While it is still a technical document, we are trying to make it somewhat user friendly while assuring that it remains technically

accurate. You will see where we really need OASQA's input. The other document is a draft executive summary of the data process.

We are requesting that QASQA to review all 3 documents. As usual - there is a tight turn-a-round on the review. We need your initial comments no later than 2 pm on Thursday June 7th. We must forward the documents to the HQs EU on Friday June 8th - any would like the lab's input prior to sending the documents to HQs,

I am in a training class this week - but am stepping out as necessary to work on this matter. Please do not hesitate to contact me with any questions.

Thanks - Kelley
